

MATHEMATICS

MERSEYSIDE LABOUR MARKET

Maths is a really versatile subject leading to careers all over the country. Whether using maths to support a career as a sound engineer, an investment analyst, a data scientist or a meteorologist your skills are in demand. Logical thinking, problem solving, investigative approach and the ability to rigorously test are a few of the many skills sought after by employers across many sectors and industries. Studying maths helps you to handle and interpret data, solve problems, develop paying attention to detail and to think abstractly. A mid-career accountant with 5 to 9 years of experience earns an average salary of £38,000 per year in Liverpool. A person working in Accounting and Finance in the same place can earn around £87,300 per year. Salaries can go up to £175,000.
