

PHYSICS

GREATER LINCOLNSHIRE LABOUR MARKET

Studying physics provides many skills including those needed for a career in scientific research and engineering. But have you considered that the same skills can support careers available across the UK in ICT (software development and computing) and also a range of careers in business, accountancy and law. Physics can be transferred into a range of things from high-tech production to handmade crafts, turning raw materials or chemicals into finished produces. The average architect salary in the North West England is £58,530 a year and can be as high as £150,000!

LABOUR MARKET
