

Strand	Aims and purpose/Intent	Content Summary
<p>English Language & Literature</p>	<p>The chosen AQA specifications will encourage students to develop skills and knowledge for:</p> <p>Reading:</p> <ul style="list-style-type: none"> ✓ read a wide range of texts, fluently and with good understanding / Read a wide range of classic literature, and make connections across their reading ✓ develop the habit of reading widely and often ✓ read in depth, critically and evaluatively ✓ appreciate the depth and power of the English literary heritage <p>Writing:</p> <ul style="list-style-type: none"> ✓ write about their reading, using Standard English ✓ write effectively and accurately, analytically and coherently, using Standard English appropriately ✓ use knowledge gained from wide reading to inform and improve their own writing ✓ use grammar correctly, punctuate and spell accurately <p>Vocabulary:</p> <ul style="list-style-type: none"> ✓ acquire and apply a wide vocabulary, alongside knowledge and understanding of grammatical terminology, and linguistic conventions for reading, writing and spoken language. ✓ acquire the vocabulary needed to enable students to criticise and analyse what they read. <p>Spoken Language:</p> <ul style="list-style-type: none"> ✓ listen to and understand spoken language, and use spoken Standard English effectively. ✓ discuss and explain their understanding and ideas of their set texts and own wider reading. 	<p>Topics will include formal and summative assessment of reading, writing and spoken language.</p> <p>Skills will be revisited and refined across the year, to ensure that best practice in interleaving strategies to aid retrieval and memory are in place.</p> <p>English Language Paper 1 & 2 – Skills & Knowledge</p> <p>Including:</p> <ul style="list-style-type: none"> • The Lovely Bones • Glastonbury • IT • Serial Killers • Jaws • Touching the Void <p>English Literature Paper 1 & 2 - Skills & Knowledge</p> <ul style="list-style-type: none"> • Macbeth – pupils will explore Shakespeare’s use of Aristotle’s conventions of Greek tragedy in his macabre play. • A Christmas Carol – pupils will explore Dickens’ portrayal of society’s capitalist and misanthropic ideology and its impact on others. • Blood Brothers – pupils will explore society’s laissez-faire attitude towards the life chances of the working class in Liverpool during Thatcherism. • Power and Conflict Poetry • Unseen Poetry

Strand	Aims and purpose/Intent	Content Summary
<p>Mathematics</p>	<p><u>Develop fluency</u> To calculate with numbers in standard form. To solve quadratic equations (including rearrangement) by factorising. To solve linear inequalities and represent the solution set on a number line. To use $y=mx+c$ to identify parallel (and perpendicular) lines and find the equation of a line through two points. To apply and interpret limits of accuracy when rounding or truncating (including upper and lower bounds)</p> <p><u>Reason mathematically</u> To identify and interpret root, intercepts and turning points of quadratic functions. To know the difference between an equation and an identity. To derive and solve an equation (or simultaneous equations) and interpret the solution. To apply the concepts of congruence and similarity, including the relationships between lengths (areas and volume)</p> <p><u>Solve problems</u> To identify and work with fractions in ratio problems. To set up, solve and interpret the answers in growth and decay problems. To identify and apply circle definitions and properties. To use a probability model to predict outcomes of future experiments.</p>	<p>Topic will include formative and summative assessment: Bold content is Higher tier content only.</p> <p><u>Number:</u> Interpret, calculate and compare numbers in positive, negative and fractional indices. Manipulate surds (including rationalising the denominator). Understanding error intervals and calculations with bounds. Find the nth term of quadratic sequences.</p> <p><u>Algebra:</u> Form and solve simultaneous equations algebraically. Identify and draw different types of graphs (using completing the square). Factorising quadratics with a coefficient of x^2 larger than 1. Equation of a tangent to a circle.</p> <p><u>Ratio, proportion and rate of change:</u> Direct and inverse proportion. Enlargements and similar shapes, Similar shapes (area and volume)</p> <p><u>Geometry and measures:</u> Area and perimeter of sectors. Trigonometry in right-angled triangles. Problem solving including Pythagoras and trigonometry. Revisit angles in polygons and parallel lines.</p> <p><u>Probability:</u> Tree diagrams. Venn diagrams. Conditional probability.</p> <p><u>Statistics:</u> Stem and leaf diagrams. Reverse mean. Averages from grouped data. Cumulative frequency and box plots.</p> <p><u>Develop fluency</u></p> <ul style="list-style-type: none"> • Consolidate their numerical and mathematical capability from KS3 and extend their understanding of the number system • Select and use appropriate calculation strategies to solve increasingly complex problems • Consolidate their algebraic capability from KS3 and extend their understanding of algebraic simplification and manipulation

Strand	Aims and purpose/Intent	Content Summary
		<ul style="list-style-type: none"> • Move freely between different numerical, algebraic, graphical and diagrammatic representations <p>Reason mathematically</p> <ul style="list-style-type: none"> • Extend and formalise knowledge of ratio and proportion, including trigonometric ratios • Make and test conjectures about generalisations that underlie patterns and relationships • Reason deductively in geometry, number and algebra <p>Solve problems</p> <ul style="list-style-type: none"> • Make and use connections between different parts of mathematics to solve problems • Model situations mathematically and express the results using a range of formal mathematical representations • Select appropriate concepts, methods and techniques to apply to unfamiliar and non-routine problems

Strand	Aims & purpose/Intent	Content Summary
Science	<p><u>Working Scientifically</u></p> <ul style="list-style-type: none"> To experience different types of scientific enquiry. To develop understanding of the nature, processes and methods of science through different types of science enquiries that help them to answer scientific questions about the world around them. To explore the uses and implications of science today and for the future. <p><u>Biology</u></p> <ul style="list-style-type: none"> To experience how vital gases are to the survival of all species To develop knowledge of how key structures in living things remain alive and fight infection. To explore the role genes play in the survival of a species. <p><u>Chemistry</u></p> <ul style="list-style-type: none"> To experience how reactions can be controlled and their products analysed To develop understanding of collisions within reactions and how organic chemistry is vital to the modern world. To explore further how atmospheric gases affect the natural world and how chemistry plays a huge role. <p><u>Physics</u></p> <ul style="list-style-type: none"> To experience how forces interact and newton's laws. To develop further how domestic electricity can be generated in the modern world. To explore the huge and fundamental concepts of waves and those within the electromagnetic spectrum. 	<p><u>Biology</u></p> <p><u>Cell Biology</u> Discovering the organelles that are found in both Eukaryotic and Prokaryotic cells. Students will develop their knowledge of how to prepare a slide mount and how to correctly calculate the size of cells and organelles. Discovering the adaptations of specialised cells and the importance of cellular transport in terms of Diffusion, Osmosis and active transport.</p> <p><u>Organisation</u> Developing a greater understanding of how cells are organised into tissues and how tissues work together to form organs. Discovering in detail how the digestive system is organised and how enzymes help to digest the food. Discovering how the circulatory system is organised through an in-depth look at the heart and blood vessels and then moving on to study health issues including non-communicable diseases including cancer. Finally transport systems in plants will include an investigation using apparatus called the 'Potometer'</p> <p><u>Infection and response:</u> Students will use their knowledge of cells and tissues to begin exploring pathogens and how they can affect the body. Students will also further develop their knowledge of specialised cells by exploring how the body responds to infection and build immunity.</p> <p><u>Bioenergetics:</u> Students will learn about the key chemical processes that underpin life on Earth. Exploring how plants harness the Sun's energy in photosynthesis in order to make food. This process liberates oxygen which has built up over millions of years in the Earth's atmosphere. Animals have adapted to be able to use this oxygen as well as glucose to release energy for cellular processes.</p> <p><u>Chemistry</u></p> <p><u>Atomic structure and the periodic table:</u> Students will build on their learning of particles and kinetic theory in KS3 to further understand atomic structure and the properties of subatomic particles. Students will explore the development of the periodic table and link atomic structure to the genius of the periodic table.</p> <p><u>Bonding, structure and properties of matter:</u> Students will take their understanding of atoms even further by beginning to explore how different atoms interact with one another in different types of chemical bonding. Students will also investigate and discover the properties of these different types of matter.</p> <p><u>Quantitative chemistry:</u> Apply all of our knowledge of atoms and chemistry to date, as well as all of the numeracy skills we have built up to be able to measure amount of substance and quantify chemical reactions through calculation.</p> <p><u>Chemical changes:</u> Use our knowledge of chemical reactions at KS3 to be able to articulate and describe key chemical reactions such as neutralisation and redox. Students should further strengthen their ability to write chemical word and symbol equations as well as be able to describe how to prepare pure dry salts.</p>

Strand	Aims & purpose/Intent	Content Summary
		<p><u>Energy changes:</u> Energy changes are an important part of a chemical reactions. The interaction of particles often involves transfer of energy due to breaking and formation of bonds. Students will discover how these energy changes could be useful in different contexts.</p> <p>Physics</p> <p><u>Energy:</u> Use knowledge and understanding of the common forces studied at KS3 to begin quantifying energy using equations for different forms of energy. Students will also explore energy transfers and dissipation, thinking of solutions to dissipated energy.</p> <p><u>Electricity:</u> Students will use their basic knowledge of electrical circuits and how we represent them and the knowledge they have so far of electrical characteristics to deepen their understanding. Students will explore the different characteristics in different contexts such as series and parallel circuits. There will be a focus on resistance and how we can investigate resistance.</p> <p><u>Particle model of matter:</u> Link our knowledge of particles from chemistry to build schema and deepen our understanding of particles. Students will explore the arrangement and movement of the different states of matter and will also explore more complex ideas such as specific heat capacity and specific latent heat.</p> <p><u>Atomic structure:</u> Students will again link to their chemistry knowledge, increasing their knowledge base of atomic structure by exploring nuclear stability and radioactive decay. Students will also gain understanding of three common types of radiation – alpha, beta and gamma – and will explore their properties.</p>

Strand	Aims and purpose/Intent	Content Summary
<p>Religious Education</p>	<p>Year 10 pupils will experience the importance of forgiveness and reconciliation through the expression of belief through art, music and prayer.</p> <p>Year 10 pupils will develop an understanding of the concepts of justice, social harmony and human dignity through Catholic teaching on such contemporary issues as the use of nuclear weapons, modern day warfare the treatment of refugees and human rights.</p> <p>Year 10 pupils will explore biblical perspectives on climate change, war and terrorism, sanctity of life and poverty.</p>	<p>Students will explore and examine the following topics from AQA GCSE Religious Studies Syllabus B programme of study:</p> <p>Creation: students will explore the Catholic understanding of creation, particularly the notions of God as creator, humanity as the image of God and the role of humanity as stewards of creation. They will examine the agency of the Church in tackling global concerns about the environment and the Catholic understanding of the harmony between science and religion through different understandings of Genesis 1 and 2.</p> <p>Incarnation: students will explore the Catholic understanding of Incarnation as the revelation of God in the image of humanity. They will consider the significance of the example and teaching of Jesus as the source for moral teaching alongside the importance of the sacramental nature of reality and expressions of beliefs about Jesus in symbol and statuary. This will lead to an examination of different Christian views about images of Jesus.</p> <p>The Triune God: students will consider Catholic understanding of the glory of God and the mystery of the Trinity. They will explore expressions of this belief in music, scripture and tradition along with the authority and influence of the magisterium and the practice of prayer.</p> <p>Religion, Peace and Conflict: students will study four dialogues in this unit: Christian perspectives on human violence, justice, forgiveness and reconciliation; Christian perspectives on societal war and just war; Holy War and pacifism and Christian perspectives on terrorism and Christian initiatives in conflict resolution and peace making.</p> <p>Religion, Human Rights and Social Justice: students will study four dialogues in this unit: human rights and religious freedom; perspectives on wealth; perspectives on poverty and prejudice and discrimination.</p> <p>Redemption: students will explore the Paschal mystery of salvation as it is understood in Catholic theology and as it is celebrated and realised in Catholic worship, as well as the Church as the ‘Body of Christ’ and a redeemed ‘People of God’. They will explore different aspects of the mystery of redemption and how it facilitates worship, salvation (past, present and future) and grace with a key focus on the Sacrament of the Eucharist.</p> <p>The Church and the Kingdom of God: students will explore the nature of the Church and its mission to bring about the Kingdom of God as expressed in the Lord’s Prayer. Catholic understanding of the Church as the pilgrim people of God will be explored through the study of dramatised prayer and pilgrimage and the meaning of mission through vocation and service.</p> <p>Note: topics will include formal and summative assessment.</p>

Strand	Aims and purpose/Intent	Content Summary
Geography	<p><u>Locational Knowledge</u> To experience...different climates, cultures, demographics and geomorphology. To develop...develop and extend their knowledge of locations, places, environments and processes, and of different scales including global; and of social, political and cultural contexts. To explore...a wider range of locations on a global scale with a broadening and deepening understanding of locational contexts, including greater awareness of the importance of scale and the concept of global</p> <p><u>Processes</u> To experience...a variety of physical and human geographical features of the world. For example, coastal morphology. To develop... an understanding of the interactions between people and environments, change in places and processes over space and time, and the interrelationship between geographical phenomena at different scales and in different contexts. To explore... how processes bring about spatial variation and change over time as well as multivariate nature of 'human-physical' relationships and interactions</p> <p><u>Geographical Skills</u> To experience... increased involvement in planning and undertaking independent enquiry in which skills and knowledge are applied to investigate geographical questions.</p> <p>To develop...develop and extend their competence in a range of skills including those used in fieldwork, in using maps and Geographical Information Systems (GIS) and in researching secondary evidence. To explore...a range of sources used to interpret geographical information including maps, diagram, photographs, statistical analysis etc.</p>	<p>The challenge of natural hazards – Within this section of the curriculum students will study a variety of natural hazards on a local and global scale. Students will begin by studying tropical storms, How they form, the destruction they cause and how we manage these events. They will then study plate tectonics, understanding the theory behind tectonics and the consequences of plate movement in the form of earthquakes, volcanoes and tsunamis. Students will also study local hazards in the UK such as flooding and blizzards. This section of the curriculum will also look at climate change and its relationship to natural hazards.</p> <p>Urban Issues and challenges - Students will study the opportunities and challenges in a HIC city (Liverpool, UK) and the opportunities and challenges in an LIC city (Lagos, Nigeria). Within this unit of work students will be expected to compare and contrast these locations and be able to evaluate the successes in meeting the challenges each of these places have. Students will also look at sustainability and what our cities of the future will look like.</p> <p>Physical Landscapes in the UK - Students will study the coastal areas of the UK. They will again look at the processes that shape our coastline and the landforms that are created. They will investigate the coastal management strategies used in the UK and evaluate their effectiveness.</p> <p>Fieldwork Opportunities - Students conduct fieldwork in year 10. This is a one day visit to Liverpool city centre to investigate the impact of regeneration. A second trip is a residential to Colomendy in North Wales to study the cross profile of river meanders and the flow rates within a river from the upper, middle and lower course.</p>

Strand	Aims and purpose/Intent	Content Summary
<p>Travel & Tourism Tech Award</p>	<p>To experience...different destinations, climates, cultures, demographics and tourism businesses etc.</p> <p>To develop...develop and extend their knowledge of locations, places, environments and processes, and of different scales including global; and of social, political and cultural contexts.</p> <p>To explore...a wider range of locations on a global scale with a broadening and deepening understanding of locational contexts, including greater awareness of the importance of scale and the concept of global in the context of travel and tourism.</p>	<p>Component 1: Travel and tourism organisations and destinations</p> <p>Learners will investigate travel and tourism organisations, their aims and how they work together. They will explore types of travel and tourism and the features that make destinations appealing to visitors.</p> <p>Topics covered in sections A of this component are:</p> <ul style="list-style-type: none"> - Travel and tourism organisations - Ownership of travel and tourism organisations - Aims of travel and tourism organisations - How travel and tourism organisations work together <p>Topics covered in section B of this component are:</p> <ul style="list-style-type: none"> - Types of tourism - Tourist destinations - Reasons for travel - Types of holiday <p>Component 2: Influences on global travel and tourism</p> <p>Learners will explore the different factors that may influence global travel and tourism, and how travel and tourism organisations and destinations respond to these factors. Learners will examine the potential impacts of tourism at global destinations and how destinations can manage the impacts of tourism and control tourism development to achieve sustainable tourism.</p> <p>Topics covered in this component include:</p> <ul style="list-style-type: none"> - Factors influencing global travel and tourism - Responses to these factors - Possible impacts of tourism - Sustainability and management - Tourism development - The importance of partnerships

Strand	Aims and purpose/Intent	Content Summary
<p>History</p>	<p>To know and understand</p> <p>This thematic study will enable students to gain and develop an understanding of how the identity of the people of Britain has been shaped by their interaction with the wider world. Pupils will consider invasions and conquests and explore the country's relationship with Europe and the wider world. It will consider the ebb and flow of peoples into and out of Britain and evaluate their motives and achievements. Pupils will gain an understanding of the causes, impact and legacy of Empire upon the ruled and the ruling in the context of Britain's acquisition and retreat from Empire.</p> <p>Pupils explore evidence to gain an understanding of how Viking, French, Irish, American and Asian civilisations shaped British civilisations and how equally British civilisation shaped so many colonial societies around the globe. Pupils explore sources of evidence to gain an understanding of the various reasons for British imperial successes and failures and apply this understanding to construct their own substantiated perspectives. Pupils gain knowledge, demonstrate understanding and reach judgements on the utility of sources and significance of events considering the concepts of social, political, economic, religious, and military history within short and long-term timescales.</p> <p>To gain and deploy historically grounded abstract terms and concepts: Terms such as 'migration', 'diaspora', 'heptarchy', 'earldoms', 'sovereignty', 'plunder', 'militaristic', 'colonise', 'indigenous', 'monopoly', 'dominion', 'mutiny', 'globalisation', 'decolonisation', 'colour-bar', 'single-market', 'European Union' and 'Eurosceptic' are explored. The historical concepts of change and continuity, cause and consequence, similarity, difference and significance are all explored and used to make connections, draw contrasts, analyse trends, frame historically valid questions and develop structured accounts, narratives and analyses.</p> <p>Pupils will experience the methods of historical enquiry, explore how evidence is used to make historical claims and to develop historical perspectives by placing developing knowledge into different contexts.</p> <p>Pupils gain knowledge, demonstrate understanding and reach judgements on the utility of sources and significance of events considering the concepts of social, political, economic, religious, and military history within short and long-term timescales.</p>	<p>Topics: Britain, Migration, Empires and the People.c.790-modern day</p> <ul style="list-style-type: none"> • Conquered and Conquerors – Viking invasions to the impact of The Hundred Years War • Looking West – John Cabot's discovery of Newfoundland to migration into and out of 17th century Britain • Expansion and Empire – British Empire in India and Africa and its impact on movement within the Empire. • Britain in the 20th Century – The end of Empire, its legacy and Britain's changing relationship with Europe. <p>Thematic analysis of each topic:</p> <ul style="list-style-type: none"> • How has Britain been affected by conquest, settlement, and migration? • What has motivated migration to and from Britain? • Why did Britain gain and lose an empire and with what effects? • How have the people of Britain and the wider world responded to, and been influenced by, interaction? • What is the significance of key individuals and events in the development of empire and British identity?

Strand	Aims and purpose/Intent	Content Summary
<p>MFL</p>	<p>Linguistic competence & cultural understanding</p> <ul style="list-style-type: none"> • develop their ability to communicate confidently and coherently with native speakers in speech and writing, conveying what they want to say with increasing accuracy • express and develop thoughts and ideas spontaneously and fluently listen to and understand clearly articulated, standard speech at near normal speed • deepen their knowledge about how language works and enrich their vocabulary to increase their independent use and understanding of extended language in a range of contexts • acquire new knowledge, skills and ways of thinking through the ability to understand and respond to authentic spoken and written material, adapted and abridged, as appropriate, including literary texts • develop awareness and understanding of the culture and identity of the countries and communities where Spanish is spoken make appropriate links to other areas of the curriculum to enable bilingual and deeper learning, where the language may become a medium for constructing and applying knowledge • develop language learning skills both for immediate use and prepare them for further language study in school, higher education or employment • develop language strategies, including repair strategies. 	<p>Topics will include formal and summative assessment of listening, speaking, reading, and writing.</p> <p>Topics:</p> <p>mi familia y yo: using a range of reflexive verbs (three tenses) to talk about family relationships and friendships; using the present continuous; using <i>estar</i> to talk about relationship status; using <i>desde hace</i> with the present tense; talking about household chores and how you help at home.</p> <p>En casa: using <i>ser/estar/hay</i> to give full descriptions of your house; using prepositions to give detailed descriptions; using the conditional tense to say what your ideal home would be like.</p> <p>Mi ciudad – ahora y antes: using <i>unos/unas</i>; using <i>lo + adjective</i> to give sophisticated opinions about your hometown; using a range of tenses to describe what your town is like/used to be like, and how you would change it for the better; using the present subjunctive; using <i>se puede(n) + infinitive</i>.</p> <p>De compras: Naming and recognising different shops; talking about opening and closing times; buying gifts and souvenirs; giving and understanding directions; using the future tense to talk about gift ideas; comparing different kinds of shopping (online and physical) using the comparative; expressing shopping preferences; using demonstrative adjectives; making complaints at the shop.</p> <p>Mis estudios: understanding complex structures expressing opinions about a range of school subjects; talking about how you study/used to study/would like to study in the future; the significance of learning other languages.</p> <p>La vida escolar: using a range of tenses to compare your school and its facilities with your former school; talking about problems in school and pressures facing young people; expressing opinions about school rules and uniform; talking about extracurricular activities.</p>

Subject	Aims and purpose/Intent	Content Summary
Computer Science	<p>Computer Science will encourage pupils to:</p> <ul style="list-style-type: none"> • Understand and apply the fundamental principles and concepts of Computer Science including abstraction, decomposition, logic, algorithms, and data representation • Analyse problems in computational terms through practical experience of solving such problems, including designing, writing and debugging programs • Think creatively, innovatively, analytically, logically and critically • Understand the components that make up digital systems, and how they communicate with one another and with other systems • Understand the impacts of digital technology to the individual and to wider society • Apply mathematical skills relevant to computer science 	<p>Computational thinking, algorithms and programming</p> <p>This component incorporates and builds on the knowledge and understanding gained in Component 1, encouraging pupils to apply this knowledge and understanding using computational thinking. Pupils will be introduced to algorithms and programming, learning about programming techniques, how to produce robust programs, computational logic, translators and facilities of computing languages and data representation. Pupils will become familiar with computing related mathematics.</p> <ul style="list-style-type: none"> • Algorithms • Programming techniques • Producing robust programs • Computational logic • Translators and facilities of languages • Data representation <p>Programming Project</p> <p>Pupils will draw on of the content above when completing the Programming Project.</p> <ul style="list-style-type: none"> • Programming techniques • Analysis • Design • Development • Testing and evaluation
Information Technology	<p>Information Technology will give pupils the opportunity to develop sector-specific knowledge and skills in a practical learning environment. The main focus is on four areas of equal importance, which cover the:</p> <ul style="list-style-type: none"> • development of key skills that prove their aptitude in digital information technology, such as project planning, designing and creating user interfaces, creating dashboards to present and interpret data 	<p>Exploring User Interface Design Principles and Project Planning Techniques</p> <p>As digital technologies and organisations continue to evolve, each new development offers new and exciting ways of completing tasks and interacting with our hardware devices. Each new development opens up a new project with a new set of user requirements that needs to be solved. In this component, pupils will learn different project planning techniques that can be used to both plan and deliver a project that meets a set of user requirements.</p> <p>Pupils will develop their understanding of what makes an effective user interface and how to effectively manage a project. They will use this understanding to plan, design and create a user interface.</p> <p>This component will build on Key Stage 3 where pupils have learned about computer systems and software applications.</p>

	<ul style="list-style-type: none"> • process that underpins effective ways of working in digital information technology, such as project planning, the iterative design process, cyber security, virtual teams, legal and ethical codes of conduct • attitudes that are considered most important in digital information technology, including personal management and communication • knowledge that underpins effective use of skills, process and attitudes in the sector such as how different user interfaces meet user needs, how organisations collect and use data to make decisions, virtual workplaces, cyber security and legal and ethical issues. 	<p>Effective Digital Working Practices</p> <p>Pupils will explore how organisations use digital systems and the wider implications associated with their use.</p> <p>Modern organisations are increasingly reliant on the use of digital systems to complete every day, business-critical tasks. The development of these systems has presented organisations with many opportunities to work in new, inventive and flexible ways to achieve their aims. The systems have also brought new challenges and a range of responsibilities.</p> <p>This component will give pupils an opportunity to:</p> <ul style="list-style-type: none"> • explore how the developments in technology over recent years have enabled modern organisations to communicate and collaborate more effectively than ever before. • explore the digital systems available to organisations and how their features have an impact on the way organisations operate. • explore how developments in technology have led to more inclusive and flexible working environments, and how regulation and ethical and security concerns influence the way in which organisations operate. • analyse information in a range of vocational contexts so that you develop a greater understanding of the use of digital systems by organisations and so that you are able to make reasoned judgements on the systems. <p>This component builds on Key Stage 3 where pupils will have learned how to use technology responsibly and how organisations can use technology safely and about the cyber security issues when working in a digital organisation.</p>
<p>iMedia</p>	<p>iMedia will give pupils the opportunity to:</p> <ul style="list-style-type: none"> • develop the application of creative media skills through their practical use. • develop essential knowledge, transferable skills and tools to improve their learning in other subjects with the aims of enhancing their employability when they leave education, contributing to their personal development and future economic well-being. 	<p>Pre-production Documents</p> <p>This unit will enable pupils to understand pre-production skills used in the creative and digital media sector. It will develop their understanding of the client brief, time frames, deadlines and preparation techniques that form part of the planning and creation process. Planning is an essential part of working in the creative and digital media sector. This unit will enable pupils to acquire the underpinning knowledge and skills needed to create digital media products and gain an understanding of their application.</p> <p>On completion of this unit, pupils will understand the purpose and uses of a range of preproduction techniques. They will be able to plan pre-production of a creative digital media product to a client brief, and will understand how to review pre-production documents.</p> <p>Pupils will be able to apply knowledge and understanding gained in this unit to help develop their skills further during the completion of those units</p> <p>Creating Digital Graphics</p>

	<ul style="list-style-type: none"> • encourage independence, creativity and awareness of the digital media sector. • equip themselves with a range of creative media skills and provide opportunities to develop, in context, desirable, transferable skills such as research, planning, and review, working with others and communicating creative concepts effectively. • use all of the above to create fit-for-purpose creative media products. 	<p>This unit builds on the previous unit outlined above and pupils will be able to apply the skills, knowledge and understanding gained in that unit and vice versa.</p> <p>Digital graphics feature in many areas of our lives and play a very important part in today's world. The digital media sector relies heavily on these visual stimulants within the products it produces, to communicate messages effectively.</p> <p>The aim of this unit is for pupils to understand the basics of digital graphics editing for the creative and digital media sector. They will learn where and why digital graphics are used and what techniques are involved in their creation. This unit will develop pupils' understanding of the client brief, time frames, deadlines and preparation techniques as part of the planning and creation process.</p> <p>On completion of this unit, pupils will understand the purpose and properties of digital graphics, and know where and how they are used. They will be able to plan the creation of digital graphics, create new digital graphics using a range of editing techniques and review a completed graphic against a specific brief.</p>

<p>Drama GCSE</p>	<p>To revisit and refine characterisation and the conveying of relationships through rehearsed improvisation and script extracts.</p> <p>To develop an understanding of the process of taking performance material from page to stage.</p> <p>To solidify prior learning into practice and develop theatrical knowledge, understanding and skills.</p> <p>To develop pupils understanding of the vocational demands of an actor.</p> <p>To explore how practitioners adapt their skills for different contexts.</p> <p>To experience live theatre performance and production</p> <p>To develop an understanding of a variety of theatre roles and their interrelationship</p>	<p>Topics will include formative and summative assessment</p> <p>The course is comprised of three components: One that is coursework based and internally assessed and two that are externally assessed. The three-block structure, explore, develop and apply, has been developed to allow students to build on and embed their knowledge. This allows them to grow in confidence and then put into practice what they have learned.</p> <p>The assessment structure is also designed so that students can build on what they learn, and develop their skills, as they move through the course.</p> <p>Performance Techniques – Pupils will explore the skills, elements and conventions that contribute to a theatrical performance focussing on audience impact and creative intention.</p> <p>Performance Process – Pupils will explore responding to stimulus and how to create, structure and stage performances to convey narrative, message and theme.</p> <p>Component 2 Devising Drama -</p> <p>For this unit pupils will learn how to create and develop ideas to communicate meaning in a devised theatrical performance. Pupils will develop their ability to</p> <ul style="list-style-type: none"> • Carry out research • Develop their own idea • Collaborate with others • Rehearse, refine and amend their work in progress • Analyse and evaluate their own process of creating devised drama. <p>For assessment pupils must create an individual log book and final devised group performance.</p>

Strand	Aims and purpose/Intent	Content Summary
Music	<p><u>Performance</u> To experience performing solo and within an ensemble on a variety of instruments including voice. All KS4 students will have the opportunity to engage with peripatetic musicians and to benefit from their experience. To develop musical skills such as instrumental technique, articulation, tuning, expressive use of dynamics and ensemble skills. To explore a variety of genres through performance within the classroom context including Indian, Mediterranean, African, Caribbean, Pop, and Classical. The opportunity to engage with extra curricula music, instrumental lessons, choir and band.</p> <p><u>Listening</u> To experience music from a variety of cultures and genres including Concertos, World music and Pop music. Explore the way musical elements inter-relate and combine to produce specific effects and atmospheres. To develop an understanding of key terms and theory including technical vocabulary relating to specific genres such as instruments, rhythm patterns and scales. To explore musical traditions and techniques from a variety of cultures. To investigate the role of music within different societies. To explore how music has changed over time, for example the development of Pop from rock 'n' roll through to current singer songwriters.</p> <p><u>Composing</u> To experience different types of musical composition using a wide variety of techniques and starting points. To develop their sense of harmony and melody and to explore the use of instrumentations and arrangement. To explore the use of technology and its use within composition. To develop their knowledge of theory and notation through the practical application of the same to composition project. To develop and explore their own creativity in response to specific briefs and composition projects. To explore how atmospheres are created through manipulating musical elements.</p>	<p><i>Course overview</i></p> <p>The course is comprised of three components, two components will be complete or underway in year 10. Students will focus on developing their understanding of different music genres, improving their rehearsal and performing skills and developing their ability to compose music.</p> <p><i>Component 1 - Exploring Music Products and Styles</i></p> <p>Students will be able to demonstrate an awareness of the techniques and elements used in a range of musical styles and to be able to apply that understanding to create short musical examples for musical products. The component is split into two tasks. In task 1, students will compile a portfolio of evidence that demonstrates their understanding of four different styles of music. They will spend time researching the four different genres and exploring their musical traditions through performance activities and listening activities. In task 2, learners will create three 30–60-second compositions related to a theme. The composition will relate to a genre or theme.</p> <p><i>Component 2 - Music Skills Development</i></p> <p>During component 2 students will plan and create two musical outcomes (performance or composition) in different musical areas in response to a theme that will develop professional and musical skills. Throughout this component you must evidence your development. This can be done through recordings of performances or draft versions of compositions.</p>

3D DT	<p>To experience</p> <ul style="list-style-type: none"> Students will build on prior knowledge and understanding of previous year to commence the production of a portfolio comprising a sustained project and a selection of further work and mini projects this will form the basis of a NEA for component 1. They will explore a wider range of 3D materials/ processes and develop further key skills and techniques explored in year 9 this will include revisiting techniques acquired to strengthen knowledge skill and ability Be exposed to a wider range of designers, artists and crafts Widen experience of three-dimensional design areas to take in: jewellery and body adornment; Product design. To develop Develop a wider range of usable subject specific language. Skills using greater variety of media to realise three dimensional responses in metal and found materials in addition to polymers, papers and card from experiences of these in KS3 <p>To explore</p> <ul style="list-style-type: none"> Sources of inspiration in order to develop personal intentions suitable for realisation in three dimensions. The specific needs of audience or clients and how these expectations can be personal or determined by external factors. Experience the sequencing of the design process to be successful at unit 2 in yr.11 	<p>Three- Dimensional Design</p> <ul style="list-style-type: none"> Students will build upon the knowledge understanding and skills acquired and developed in year 9 when engaged in realising personal intentions/responses to three dimensional designs in the areas of architecture and product design. Extend these into other areas of 3D such as jewellery and casting. <p>Knowledge and Understanding</p> <ul style="list-style-type: none"> Pupils will develop a knowledge and understanding of the way sources inspire the development of ideas by investigating a range of historical and contemporary sources, such as the work of Antoni Gaudi, The Bauhaus and Macel Bruer, with a view to more personalised and developed outcomes, through a wider range of materials and process Surface embellishment using line tone and texture through block printing and using card and paper as mediums to present personalised architectural sculptures Producing maquettes developing ideas around structure into real life applications in the development of functional pavilions. Development from 2D to 3D, including forming by wasting in wood to produce a 3d puzzle. Design and manufacture a Bauhaus inspired tangram and associated packaging through CAD CAM working in polymer. Develop ability to use 3D techniques to model make and digitally model using appropriate software and programs. Develop working in metals/ found materials to produce a piece of jewellery to meet a client brief. Be able to evaluate the work of others, express intent, experience of process, obstacles overcome and quantify success of outcomes both oral and written.

Hospitality and Catering	<p>To experience</p> <ul style="list-style-type: none"> • Good food & personal hygiene • Professional & complicated techniques in food presentation • Working with & tasting foods suited to specific dietary requirements <p>To develop</p> <ul style="list-style-type: none"> • Confidence to execute a range of cooking methods & cooking skills with precision & professionalism when making both savoury & sweet dishes • Technical knife skills to ensure safe preparation of a food product • Awareness of the importance in the prevention of food poisoning • Ability to follow basic food safety & Health & Safety legislation • Knowledge of the range of factors that can & do affect the Hospitality & Catering sector • Understanding of the importance of meeting customers' needs, following customers trends & adhering to customers rights <p>To explore</p> <ul style="list-style-type: none"> • Decorative & technical techniques when presenting a food product • Correct methods to conduct cooking methods such as boiling, baking & frying • Methods & techniques to execute cooking skills at a high level with complex accompaniments or garnishes 	<p><u>Practical Content</u></p> <p>How to prepare & make dishes – Pupils will be able to identify types of skill levels when selecting dishes to produce. They will gain knowledge on how some dishes require more complex skills & be able to demonstrate a range of food preparation & cooking techniques. This will include preparation techniques such as laminating; piping; dehydrating; marinating; etc. This will also include knife techniques such as deboning; spatchcock; filleting; etc & cooking techniques such as caramelising; baking; tempering; etc.</p> <p>Presentation techniques – Pupils will understand the importance of using appropriate presentation techniques during the production of dishes. These presentation techniques will include garnish; decoration; portion control; etc.</p> <p>Food safety practices – Pupils will be able to demonstrate how to work safely, follow correct personal & food safety & hygiene practices & procedures in relation to the preparation & cooking of food & use of equipment & facilities.</p> <p><u>Theory Content</u></p> <p>Hospitality & Catering Providers – Pupils will investigate the different types of hospitality & catering provisions; commercial & non-commercial; residential & non-residential. They will also look into different food services that each type of provision may provide & how they operate. Food services will include cafeteria; fast food; transported meal systems; etc. Pupils will also gain an understanding of the importance of hotel & guest house standards, along with awards such as Michelin stars.</p> <p>Working in the hospitality & catering industry – Pupils will gain an understanding of the roles & responsibilities within the industry, focusing on job roles within front and back of house. This will include looking into their job description, salaries, working hours, etc. Pupils will discover the purpose of the kitchen brigade & investigate the benefits this has on a catering kitchen. Additionally, pupils will look into the personal attributes, qualifications & experience required for the range of job roles the industry provides.</p>

Subject	Aims and purpose/intent	Content Summary
		<p>Working conditions in the hospitality & catering industry – Pupils will be able to discuss the different types of employment contracts within the sector, focusing on remunerations & other benefits that employees can receive. Pupils will investigate the fluctuating needs of the industry & how this links to current times.</p> <p>Contributing factors to the success of hospitality & catering – Pupils will understand how a business can incur basic costs, along with pupils learning how to calculate gross & net profit. They will also look into how the economy; environment; technology; media can impact businesses in both positive & negative ways.</p> <p>How hospitality & catering provisions operate – Pupils will become aware of the operational requirements of the front & back of house, focusing on equipment, materials & documentation. They will also investigate how hospitality & catering provisions meet the requirements of customers, inclusion & equality.</p>
